gno.land

0 - Initialisation

Installation of Gno
Setup local environment

🔗 *Useful links available in description*

Prerequisities

- Basic programming knowledge

- Familiarity with Blockchain / Web3 concepts

What is Gno.Land ?

- Layer 1 Blockchain

- Gno language (interpreted Go variant)

- Open-source and readable smart contracts

- Based on two components:
  Realms = Smart Contracts
  Packages = Shared Libraries

- Native token: **GnoT**

Go Environment Setup

If Go isn't already configured, add this to your shell config (.bashrc, .zshrc, etc.):

```
export GOPATH=$HOME/go
export PATH=$PATH:$GOPATH/bin
```

💡 Then restart your shell or run:

```
source path/to/shell_config
```
